Education

Cochin University of Science and Technology 2023 – Present
Bachelor of Technology in Computer Science & Engineering, CGPA: 7.9 4th Year

Experience

Nestsoft Technologies June 2026
AI/ML Intern

- Developed AI assistants for a Learning Management System (LMS) using Retrieval-Augmented Generation (RAG).
- Built an FAQ chatbot and an academic assistant capable of retrieving and generating accurate responses from the platform's knowledge base.
- Worked with AI/ML concepts, document retrieval, prompt engineering, and chatbot integration to improve user support.

Stroxx Technologies May 2025 – June 2025
AI/ML Intern

- Developed a content-based music recommendation system using word-frequency similarity techniques.
- Implemented recommendation logic and integrated it with a React (Vite) frontend for real-time suggestions.
- Gained practical experience in machine learning workflows and AI application development.

Keltron May 2024
Django Intern

- Learned Django fundamentals including project structure, apps, templates, and routing.
- Built basic web applications by connecting views, URLs, and dynamic templates.
- Strengthened backend development fundamentals through hands-on projects.

Projects

loanCopilot – AI Loan Automation Platform Next.js, TypeScript, MongoDB, Mastra, Gemini API

- Built an AI-powered loan automation platform using Next.js, TypeScript, MongoDB, and Gemini.
- Implemented OCR with Tesseract.js and stage-based loan processing workflows.
- Developed a RAG-powered policy search system using MongoDB Vector Search.
- Built JWT authentication, PDF generation, and automated FOIR-based credit analysis.

Music Recommendation System React (Vite), JavaScript

- Developed a content-based recommendation system using word frequency and similarity comparison.
- Implemented algorithms to analyze song features and dynamically recommend similar tracks.
- Built a responsive frontend using React for seamless user interaction.
- Integrated the recommendation engine with the user interface for real-time suggestions.

Football Tactics Planner Flutter, Dart

- Developing a mobile application to design and visualize football tactics and formations.
- Implementing drag-and-drop functionality for dynamic player positioning on the field.
- Designing intuitive Flutter UI components for smooth interaction and real-time updates.
- Working on features to save, edit, and manage multiple tactical setups for future analysis.

Technical Skills

Operating Systems: Windows, Linux
Languages: Python, C, C++, Java, PHP
Frontend: HTML, CSS, JavaScript, React, Next.js
Backend: Django, Next.js
Databases: MongoDB, MySQL
Tools: Git, VS Code

Languages

English (Fluent) Malayalam (Native)
